

## Mechanism Training Programme

Keeping current with developments in your field of expertise through continuing professional education plays an important role in national efficiency within the EU Mechanism. The courses offered by the **European Community Civil Protection Mechanism Training Programme** present a wide range of opportunities for civil protection experts.

To get an overview of the courses, download the **brochure**.

In order to find out how you can take part in trainings, click on:

## Certified Evaluators

The European Commission attaches great importance to the evaluation of international exercises.

The Netherlands has developed an ***International Master Class for Evaluators*** to prepare observers for the international exercises. To learn more about this new development, click here:
